The NCPS was established in 1999 to develop and nurture a culture of safety throughout the Veterans Health Administration. Our goal is the nationwide reduction and prevention of inadvertent harm to patients as a result of their care. Patient safety managers at 151 VA hospitals and patient safety officers at 21 VA regional headquarters participate in the program.

Advances in Patient Safety: From Research to Implementation. This tool was developed to help researchers evaluate their research and develop appropriate dissemination plans, if the research is determined to have "real world" impact. Creation and testing of the tool is described in Development of a Planning Tool to Guide Research Dissemination. (PDF version - 157.95 KB) (Microsoft Word

Ensuring reliable receptacles in the patient care environment is an important part of keeping patients, families and staff safe. To ensure proper operation of devices during emergency situations and to enhance electrical safety, a policy should be designed to promote a safe and healthy work environment for employees working with any electric appliances or equipment and to comply with
