Respiratory therapy is best described as the assessment and treatment of patients with both acute and chronic dysfunction of the cardiopulmonary system.

Today's respiratory therapists have demanding responsibilities related to patient care and serve as vital members of the healthcare team.

Respiratory therapists must have a broad knowledge of the pathophysiology of the cardiopulmonary system ...

Our Physiotherapy degree is strong on both theory and practice. In each of your three years you'll undertake mandatory modules, which will vary in credit weight, as well as two practice placements. You'll need to pass each of the modules in order to progress onto the next level. Then you'll have introductory sessions at the start of each academic year to support your transition between ...
